# Primary Science Progression Map

				depending on which poles are facing				
By the end of the year, children should be able to...								
Plants								
<b>Working Scientifically</b>	<b>Reception:</b> Explore the natural world around them	Explore the outdoor area of school and observe plants that are growing.	Investigate how plants disperse their seeds and why.	Plant seedlings to investigate what plants need to grow strong and healthy.				
	Explore the natural world around them, making observations and drawing picture of animals and plants (ELG)	Plant seeds in a jar or bag. Predict what will happen and start to watch them grow.  Look at flowers outside in the playground, make a large model in the classroom.	Explore plants that spread their seeds by utilising the wind.  Make a seed helicopter and a dandelion seed.  Investigate different ways that plants can disperse their seeds, including seed designed to stick on animals and humans.  Plant beans in bags of water to investigate what they need to grow into healthy plants. Predict what will happen to the bean left growing in a cupboard. Record the growth of cress seeds and predict how long it will take for them to be long enough to eat.	Record the growth of the seedlings. Make detailed, labelled drawings of what has happened.  Use data loggers to record temperature and light over a 24-hour period  Draw graphs, make drawings and write reports to explain findings from investigations.  Make close observations of different flowers with magnifiers.  Discover what happens to flowers after pollination  Ask questions and make observational drawings and notes to explore different fruits.  Make a paper seed and investigate wind dispersal by testing different versions to find the best flier.				
<b>Skills</b>	<b>Reception:</b> Describe what they see, hear and feel whilst outside	Identify the different parts of a wild flowering plant.	Observe and describe the growth of seeds and bulbs.	Identify and describe the different functions of a flowering plant.				
	Explore the natural world around them, making observations and drawing picture of animals and plants (ELG)  Participate in small group, class and one-to-one discussions, offering their	Describe what each part of a wild flowering plant does.  Identify a variety of common wild and garden plants.	Find out and describe what plants need to grow and stay healthy.  Explain the difference between seeds and bulbs.  Identify and explain the different parts of a plant.	Explore what plants need for life and growth.  Investigate how water is transported within plants.  Explore what each part of the flower plays in the life cycle of a flowering plant.				

## Primary Science Progression Map

	<p>own ideas, using recently introduced vocabulary (ELG)</p> <p>Make comments about what they have heard and ask questions to clarify their understanding (ELG)</p>		<p>Describe the life cycle of a plant.</p>	<p>Explore what pollination and fertilisation is.</p> <p>Explore the different methods of seed dispersal.</p>			
<b>Knowledge</b>	<p><b>Reception:</b> Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter (ELG)</p>	<p>Know what plants need to grow.</p> <p>Know the different parts of a wild flowering plant.</p> <p>Name a variety of common wild and garden plants.</p> <p>Understand the difference between trees and flowering plants.</p> <p>Understand the difference between deciduous and evergreen trees.</p>	<p>Understand that seeds and bulbs grow into mature plants.</p> <p>Know what plants need to grow and stay healthy.</p> <p>Know the difference between seeds and bulbs.</p> <p>Know the different parts of a plant.</p> <p>Know the life cycle of a plant.</p> <p>Know what kind of liquid a plant needs to survive and stay healthy.</p>	<p>Know the different functions of a flowering plant.</p> <p>Know what plants need for life and growth.</p> <p>Know how water is transported within plants.</p> <p>Know what each part of the flower plays in the life cycle of a flowering plant.</p> <p>Know what pollination and fertilisation is.</p> <p>Understand how insects and other creatures are important in the pollination of flowers.</p> <p>Know the different methods of seed dispersal.</p>

Living Things and their Habitats							
<b>Working Scientifically</b>	<b>Reception:</b> Explore the natural world around them.		Explore outside, and through observation, the differences between things that are living, dead, and things that have never been alive.  Find specimens and explain how they know they are alive or otherwise.  Photograph or draw the micro-habitats in the school grounds.  Consider and draw conclusions about what lives in these microhabitats and why.  Research which minibeasts the planter habitat would benefit from and suggest ideas on how to attract them.		Ask relevant questions about living things and their habitats and begin to group them.  Observe local habitats and record living things they see around them.  Make accurate observational drawings of an invertebrate found in the local environment. Make a group large-scale drawing of an insect.  Conduct an experiment to investigate how the greenhouse effect works. Use the results to discuss how people are causing climate change.	Dissect a flower and explore the flowering plant reproduction.  Grow new plants from a range of parent plant parts.  Observe and sketch insect and amphibian lifecycles for comparison.  Research and sketch mammalian and bird life cycles for comparison.	Create a classification key.  Observe, record and classify local area living things.  Classify unusual creatures and plants.
<b>Skills</b>	<b>Reception:</b> Describe what they see, hear and feel whilst outside.  Recognise some environments that are different to the one in which they live.  Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary. (ELG)  Make comments about what they have heard and ask questions to clarify their understanding (ELG)		Describe how a microhabitat is suited to a particular minibeast.  Explain what a minibeast will need in its microhabitat.  Identify, explore and compare things that are living, dead or never alive.  Identify different sources of food.  Identify some wildlife in the local area.		Identify the seven characteristics of a living thing.  Organise animals into the major groups.  Use a classification key/branching database to group, identify and name living things according to their features.  Consider how the local environment has changed.  Consider natural and man-made changes to the environment and how living things have adapted to these changes.	Compare the similarities and differences between animals' life cycles.  Explain how different animals are suitable for their environment and habitat.  Investigate ways that plants reproduce asexually.  Describe the different parts of a dissected, real-life flower including the key sexual structures.  Explain how plants disperse seeds.	Use a branching classification key to identify subtle differences between certain plants and animals.  Design a 'new' creature that fits within a specific classification.

## Primary Science Progression Map

					Investigate how the greenhouse effect works.		
<b>Knowledge</b>	<p><b>Reception:</b> Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class (ELG)</p> <p>Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary (ELG)</p> <p>Make comments about what they have heard and ask questions to clarify their understanding (ELG)</p>		<p>Name some different minibeasts</p> <p>Know how a microhabitat is suited to a particular minibeast and what it needs to include.</p> <p>Understand how a microhabitat provides for the basic needs of different insects.</p> <p>Know things which are living, dead or never alive.</p> <p>Know what a habitat is and how it is suited for different animals and plants.</p> <p>Understand what a food chain is.</p> <p>Know how wildlife in the local area are part of the food chain.</p>		<p>Understand that living things can be grouped in a variety of ways.</p> <p>Know the seven characteristics of a living thing.</p> <p>Know how scientists use similarities and differences as a basis for organising animals.</p> <p>Understand what climate change is.</p> <p>Know natural and man-made changes to the environment and how living things have adapted to these changes.</p> <p>Know how the local environment has changed.</p>	<p>Know the similarities and differences between animals' life cycles.</p> <p>Know how different animals are suitable for their environment and habitat.</p> <p>Know how plants reproduce asexually.</p> <p>Name the different parts of a dissected, real-life flower including the key sexual structures.</p> <p>Know how plants disperse seeds.</p>	<p>Know about the seven levels of the Linnaeus' system.</p> <p>Understand what microorganisms are and why they are important.</p> <p>Know how to use a branching classification key to identify subtle differences between certain plants and animals.</p>

Knowledge	<p>own ideas, using recently introduced vocabulary (ELG)</p> <p>Make comments about what they have heard and ask questions to clarify their understanding (ELG)</p>	<p>Explain why different materials are used for certain objects.</p> <p>Match adjectives to describe the properties of different materials.</p> <p>Sort and group objects based on the properties of the materials.</p> <p>Explain what different materials are used for.</p>	<p>Identify materials that are transparent and opaque.</p> <p>Identify the similarities and differences of a variety of everyday materials.</p> <p>Explain how the shapes of solid objects made from some materials can be changed.</p> <p>Choose the best materials to use to build an object.</p>				
	<p><b>Reception:</b> Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter (ELG)</p>	<p>Know the properties of different materials.</p> <p>Know why different materials are used for certain objects.</p> <p>Know the similarities and differences between the physical properties of everyday materials.</p> <p>Know what different materials are used for.</p>	<p>Know which materials are best for certain uses.</p> <p>Know the properties of a variety of everyday materials and objects.</p> <p>Know how and why the shapes of solid objects made from some materials can be changed.</p> <p>Understand that different everyday materials have different levels of buoyancy.</p> <p>Know which materials float best.</p>				
Vocabulary	<p>Dull Glass Hard metal Plastic Rough Shiny Smooth Soft Wood</p>	<p>absorbent bendy/not bendy man-made material natural opaque pipet, Properties Stiff Stretchy waterproof/not waterproof</p>	<p>Fabric Firm Flexible Reflective Rubber Translucent Transparent Windproof</p>				
<b>Properties and changes of materials</b>							
Working Scientifically						<p>Investigate hard materials suitable for food preparation.</p> <p>Investigate thermal insulating properties of materials to keep refreshments hot or cold.</p>	

# Primary Science Progression Map

						<p>Investigate electrical insulators/conductors for health and safety purposes.</p>	
<p><b>Skills</b></p>	<p><b>Reception:</b> Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary (ELG)</p> <p>Make comments about what they have heard and ask questions to clarify their understanding (ELG)</p>					<p>Explore methods to separate mixed materials back into their constituent parts. Write up the experiments.</p> <p>Make new materials.</p>	
<p><b>Knowledge</b></p>	<p><b>Reception:</b> Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter (ELG)</p>					<p>Compare the similarities and differences of properties of everyday materials.</p> <p>Investigate soluble and non-soluble materials.</p> <p>Identify which mixtures can be separated through filtering, sieving and evaporating.</p> <p>Identify some chemists who have invented new materials.</p>	
						<p>Know the similarities and differences of properties of everyday materials.</p> <p>Know which materials are soluble and non-soluble.</p> <p>Know that some mixtures can be separated through filtering, sieving and evaporating.</p> <p>Know the difference between reversible and irreversible.</p> <p>Understand that dissolving, mixing and changes of state are reversible changes.</p> <p>Know some changes result in the formation of new materials, and that this kind of change is not usually reversible.</p>	

# Primary Science Progression Map

Vocabulary						Chemical condense Conductivity Dissolving evaporate, Filter Insoluble Irreversible Property Reversible Solubility Soluble Solute Solution solvent suspension thermal	
<b>States of Matter</b>							
Working Scientifically					Examine and compare the viscosity of ketchups.  Investigate the presence of gases.  Use a thermometer to make observations as water changes from one state to another.		
Skills					Describe the properties of solids, liquids and gases.  Explain what happens when a sweet is dropped into a fizzy drink.  Explain what happens when chocolate is melted and cooled.  Explain what happens when a liquid is frozen. Describe what happens at each stage in the water cycle.		
Knowledge					Know the difference between a solid, liquid and a gas.  Understand how particles behave in different states.  Understand what evaporation and condensation is.		

# Primary Science Progression Map

<b>Vocabulary</b>					change of state Collection condensation Cooling Energy evaporation Freeze Gas Liquid melting point Particles precipitation Process Solid State states of matter water cycle water droplets water vapour viscosity		
-------------------	--	--	--	--	--	--	--

## Seasonal Changes

<b>Working Scientifically</b>		<p>Observe the temperature and wind outside.</p> <p>Take the temperature outside in the morning and the afternoon. Record these observations in the classroom and discuss the changes.</p> <p>Track a shadow by observing and measuring it over time.</p> <p>Make a bar chart of paper strips of shadow length plotted against time intervals.</p> <p>Set up rainfall gauges up in the playground and record the rainfall over a period of time.</p> <p>Make a windsock to measure wind direction and a wind vane to measure the direction of the wind.</p> <p>Make a thermometer box to house a thermometer and use it outside in the playground.</p>					
-------------------------------	--	--	--	--	--	--	--

## Primary Science Progression Map

		Children write a list of equipment needed.					
<b>Skills</b>	<p><b>Reception:</b> Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary (ELG)</p> <p>Make comments about what they have heard and ask questions to clarify their understanding (ELG)</p>	<p>Identify objects that match to each season.</p> <p>Investigate how shadows change during the day.</p> <p>Identify the similarities and differences between difference seasons.</p>					
<b>Knowledge</b>	<p><b>Reception:</b> Understand the effect of changing seasons on the natural world around them</p> <p>Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter (ELG)</p>	<p>Understand what the weather is.</p> <p>Know that weather forecasters tell us what weather to expect.</p> <p>Know what happens in different seasons.</p> <p>Understand what happens to the day length in different seasons.</p> <p>Name the earth, sun and moon in the solar system.</p>					
<b>Vocabulary</b>	<p>Autumn Rain Seasons Snow Spring Summer Sunny weather Windy Winter</p>	<p>Heat Overcast temperature</p>					

### Light

<b>Working Scientifically</b>				<p>Investigate the nature of darkness, light and sight with a torch, a cardboard box and pencil holes.</p> <p>Predict and then investigate how well different colours and materials reflect light in a simulated dark cave. Use results to sort and classify the samples.</p> <p>Discover the properties of mirrors and reflections by undertaking different</p>			<p>Investigate and demonstrate that light travels in straight lines.</p> <p>Investigate how light reflects by making a periscope.</p> <p>Investigate shadows and how they change as a result of light sources.</p> <p>Explore split light (finding 'rainbows').</p>
-------------------------------	--	--	--	--	--	--	---

# Primary Science Progression Map

				<p>investigative tasks and use scientific knowledge on light to explain findings.</p> <p>Investigate how different objects create shadows.</p> <p>Conduct a fair test to find the precise relationship between the distance of a torch and the size of a shadow.</p> <p>Investigate how coloured light beams mix and what it's like to look through different coloured filters.</p>			Investigate coloured light mixing.
<b>Skills</b>				<p>Explain how light travels.</p> <p>Describe the difference between opaque, translucent and transparent objects.</p> <p>Explain how shadows are formed.</p>			<p>Explain why shadows have the same shape as the objects that cast them.</p> <p>Explain what transparent, translucent and opaque mean and why they are used.</p>
<b>Knowledge</b>				<p>Understand that we need light in order to see things.</p> <p>Know that dark is the absence of light.</p> <p>Understand that light is reflected from surfaces, including mirrors.</p> <p>Understand that light from the Sun can be dangerous.</p> <p>Know how to protect my eyes from the Sun.</p>			<p>Understand that light travels in straight lines.</p> <p>Know how the Sun causes shadows.</p> <p>Understand how light is affected by transparent, translucent and opaque objects.</p> <p>Know that objects are seen because they give out or reflect light into the eye.</p>
<b>Vocabulary</b>				<p>Beam block Bounce Glare Light source Ray Reflect Transparent Visible</p>			<p>absence of light Absorb Emitted Refraction Scattered</p>
<b>Forces and Magnets</b>							

## Primary Science Progression Map

<p><b>Working Scientifically</b></p>	<p><b>Reception:</b> Explore the natural world around them.</p>			<p>Ask questions and then investigate how toy vehicles run on different surfaces.</p> <p>Investigate how it is forces that make things move (pushes and pulls) and that magnetic forces can move things at a distance without forces touching.</p> <p>Investigate how magnets attract some materials and not others.</p> <p>Investigate the polarisation of magnets, making predictions and testing ideas.</p> <p>Write the method for an experiment.</p>		<p>Investigate parachutes and air resistance.</p> <p>Investigate and create levers and pulleys.</p> <p>Investigate gears.</p> <p>Investigate friction.</p> <p>Investigate boats and water resistance.</p>	
<p><b>Skills</b></p>	<p><b>Reception:</b> Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary (ELG)</p> <p>Make comments about what they have heard and ask questions to clarify their understanding (ELG)</p>			<p>Identify different forces.</p> <p>Discover which forces need contact between two objects and which ones do not need any contact.</p> <p>Identify materials that are attracted to a magnet and materials that are magnetic.</p> <p>Explain how magnets are used in everyday life.</p>		<p>Identify the effects of different types of forces.</p> <p>Investigate the impact of levers, pulleys and gears on forces.</p>	
<p><b>Knowledge</b></p>	<p><b>Reception:</b> Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter (ELG)</p>			<p>Understand what a force is.</p> <p>Know which forces need contact between two objects and which ones do not need any contact.</p> <p>Know that magnets attract or repel each other and some materials and not others.</p> <p>Understand how magnetic forces can act at a distance.</p> <p>Know that magnets have two poles.</p>		<p>Understand what gravity is.</p> <p>Understand why unsupported objects fall towards the Earth.</p>	

# Primary Science Progression Map

<b>Vocabulary</b>	magnet			attract compass Force force meter Friction Iron Magnetic magnetic field non-magnetic Poles repel spring surface Water resistance		Brake Cog Gears Gravitation Gravity Lever Mechanism Newton Opposing Pulleys Resistance streamline	
<b>Rocks</b>							
<b>Working Scientifically</b>				Observe, group, draw, describe and name rock samples.  Investigate different kinds of rocks' physical properties.  Investigate the properties of different rocks with fair testing e.g., permeability, hardness and an acid test for the presence of calcium carbonate.  Identify different rocks for different purposes in the local area. Record findings.  Investigate different soils, asking questions and seeking answers through a variety of scientific enquiries (exploring/ classifying and identifying /fair testing)			
<b>Skills</b>				Use a rock identification key.  Explain how fossils are formed.  Describe how soil is formed.			

# Primary Science Progression Map

<p><b>Knowledge</b></p>				<p>Know the differences between igneous, sedimentary and metamorphic rocks.</p> <p>Know how fossils are formed.</p> <p>Know what palaeontology is and what a palaeontologist does.</p> <p>Name different types of soil.</p>			
<p><b>Vocabulary</b></p>				<p>anthropic body fossil cast fossil chemical fossil Extinct igneous Impermeable lava magma metamorphic mould fossil organic matter Permeable replacement fossil sediment sedimentary sub soil topsoil trace fossil</p>			
<p><b>Electricity</b></p>							
<p><b>Working Scientifically</b></p>					<p>Identify electrical components and explore electrical circuits.</p> <p>Test different materials to see whether or not they complete a circuit.</p>		<p>Investigate a range of simple electric circuit challenges (planning/fair testing/exploring).</p> <p>Investigate the effects of voltage and number of components on a working circuit.</p> <p>Draw circuit diagrams.</p> <p>Design and make a dimmer switch.</p> <p>Design and create a light decoration circuit.</p>

## Primary Science Progression Map

<p><b>Skills</b></p>	<p><b>Reception:</b> Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary (ELG)</p> <p>Make comments about what they have heard and ask questions to clarify their understanding (ELG)</p>				<p>Identify electrical dangers around the home.</p> <p>Identify which appliances need electricity.</p> <p>Identify basic parts of a circuit.</p> <p>Build a circuit.</p> <p>Explain why a switch is important in a circuit and what it does.</p> <p>Predict what would happen if there was a break in the circuit.</p> <p>Identify materials which are good conductors or insulators.</p> <p>Explain why metals are good conductors.</p> <p>Identify objects which are good conductors or insulators and explain why.</p>		<p>Set up a range of circuits to identify how they work and how to achieve a range of effects.</p>
<p><b>Knowledge</b></p>	<p><b>Reception:</b> Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter (ELG)</p>				<p>Know what electricity is and why it is important.</p> <p>Know which appliances need electricity.</p> <p>Name basic parts of a circuit.</p> <p>Understand what makes a complete circuit.</p> <p>Know what a switch is and why it is important in a circuit.</p> <p>Know what would happen if there was a break in the circuit.</p> <p>Know what a conductor and insulator is.</p> <p>Know which materials and objects are good conductors or insulators.</p>		<p>Know which symbols to use when representing a simple circuit in a diagram.</p> <p>Know the effect of the voltage of cells used in a circuit on the brightness of a lamp or the volume of a buzzer.</p>

# Primary Science Progression Map

<b>Vocabulary</b>	electricity,				Appliances Buzzer Cell Circuit component Conductor crocodile clips electric conductor electrical insulator fossil fuels Mains Motor renewable energy Wires		atom Dimmer electrical symbols electrons neutrons nucleus Parallel circuit protons series circuit
<b>Sound</b>							
<b>Working Scientifically</b>					Investigate vibrations and how sound travels.  Investigate pitch and volume by exploring instruments and the different sounds they make.  Plan and conduct an investigation into which material best reduces the sounds we hear.		
<b>Skills</b>	<p>Listen attentively, move to and talk about music, expressing their feelings and responses.</p> <p>Describe what they see, hear and feel whilst outside</p> <p>Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary (ELG)</p> <p>Make comments about what they have heard and ask questions to clarify their understanding (ELG)</p>				<p>Explain how sound vibrations travel through a medium to the ear.</p> <p>Describe how musical instruments make sound.</p> <p>Explain how different sounds are made, including higher and lower pitch.</p> <p>Investigate why some materials are better for sound to travel through than others.</p> <p>Describe how the length of the vibration can affect the sound.</p> <p>Describe how distance can affect the sound.</p>		
<b>Knowledge</b>	Understand sounds they have heard.				Know what vibrations are and how they travel through a medium to the ear.		

# Primary Science Progression Map

					<p>Understand how musical instruments make sound.</p> <p>Understand how the shape of an ear affects how we hear sounds</p> <p>Know why some materials are better for sound to travel through than others.</p>		
<b>Vocabulary</b>	<p>Quiet</p> <p>Loud</p> <p>ear</p>				<p>Amplitude</p> <p>Pitch</p> <p>vibration</p> <p>Volume</p> <p>Wave</p>		
<b>Earth and Space</b>							
<b>Working Scientifically</b>						<p>Develop enquiry questions.</p> <p>Create a scale model of the solar system.</p> <p>Create an orrery to explore heliocentricity.</p> <p>Set up an investigation to demonstrate that the Earth spins on its own axis.</p> <p>Create a sundial and explore time zones.</p> <p>Implement some investigations to show why the moon appears to change shape throughout the month</p>	
<b>Skills</b>						<p>Explain the movement of the Moon in relation to the Earth.</p> <p>Explain why we have day and night and how the Earth orbits the Sun.</p> <p>Explain how a sundial works and why we have different time zones around the world.</p>	
<b>Knowledge</b>						<p>Understand the movement of the planets in relation to the Sun.</p> <p>Know the order of the planets in our solar system.</p>	

# Primary Science Progression Map

						<p>Know what waxing, waning, new and full mean in relation to the Moon.</p> <p>Understand what a lunar month is.</p> <p>Know what an elliptical orbit is.</p> <p>Understand why we have seasons.</p>	
Vocabulary						<p>Axis</p> <p>constellation</p> <p>crescent</p> <p>geocentric</p> <p>gibbous</p> <p>heliocentric</p> <p>Jupiter</p> <p>lunar</p> <p>Mars</p> <p>Neptune</p> <p>orbit</p> <p>Phases of the Moon</p> <p>Mercury</p> <p>Planets</p> <p>revolve,</p> <p>rotate,</p> <p>Rotation</p> <p>Saturn</p> <p>solar system</p> <p>Uranus</p> <p>Venus</p> <p>waning</p> <p>waxing</p>	
<b>Evolution and Inheritance</b>							
Working Scientifically							<p>Identify things that are inherited and things that are learned.</p> <p>Explore variation through dog breeds.</p> <p>Identify features that support survival in a given environment.</p>
Skills							<p>Compare the differences between environmental and inherited characteristics.</p> <p>Describe how animals are adapted to suit their</p>

# Primary Science Progression Map

							<p>environment in different ways.</p> <p>Find out about the evolutionary facts behind some traditional folk tales about features of some animals.</p>
<b>Knowledge</b>							<p>Know the difference between environmental and inherited characteristics</p> <p>Know how animals and plants are adapted to suit their environment in different ways and that this adaptation can lead to evolution</p> <p>Understand that living things have changed over time</p> <p>Understand that fossils provide information about living things that inhabited the earth millions of years ago</p> <p>Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents</p>
<b>Vocabulary</b>							<p>Evolution</p> <p>Fossils</p> <p>Gene</p> <p>Genetics</p> <p>Homo sapiens</p> <p>Inherited</p> <p>Mutation</p> <p>natural selection</p> <p>offspring</p> <p>Survival of the Fittest</p>
